

SDSBVI School Song

Spring 2001

David Lee Brown, Artis in residence, sponsored by the SD Arts Council and the SDSBVI, spent week on campus spring of 2001. During the residency David and he students worked hard at writing the music and words to go with a new school song. The lyrics to the song are as follows.

SDSBVI

It's a school, it's a one of a kind
It's for people who have trouble with their eyes
Some see a little and some are blind

Students come to Aberdeen
There are little kids and some --- cool teens
They can come from all over the state
To get an education with their --- classmates

Refrain

The school's been around for a hundred years
We've lived through changes and faced our fears
The school's been around for a hundred years
We've had good times and shed some tears

In O and M we learn to use a cane
In the halls at school or out in the rain
The sighted guide lends an arm
In busy places so we're safe from harm

The Polaron makes a beeping sound
It beeps and beeps and helps me get around
The monocular is a tool for me
It makes things bigger and helps me see

The Pioneers are what we're called
In the Special Olympics and in goal ball
We compete with different states
We give our all when we participate

Swimming and skating and riding a horse
We'll try most anything of course
Fishing and boating and riding jet skis
We'll try most anything once at least

Refrain
